## My journals

### Welcome to the ICI World of Journals system!

Specially for Editorial Offices of journals registered in the ICI World of Journals, we have prepared a dedicated IT system which will facilitate managing the Journal Passport visible on the website as well as the annual application for the indexation in the ICI Journals Master List database.

Below please find the list of journals you registered in the **ICI World of Journals** database. Each periodical receives its own Journal's Passport in the ICI World of Journals database and may be submitted for evaluation in the ICI Journals Master List database. By choosing particular sections, the content of the Journal's Passport visible on the website may be edited (e.g. description, contact details), the current cover may be added and you can share the scientific articles published in the journal.

**Remember:** registration and maintenance of the Passport in the ICI World of Journals database is not the same as the journal's indexation in the ICI Journals Master List database.
